I have been subscribed to XM Satellite Radio for 10 months now. I absolutely love it! I am happy paying for this service because now I am finally listening to what I want to. Please let XM Satellite Radio do what they need to further meet their consumers needs. Consumers are more than happy to pay now for what they want from a service or product. It's not fair for the NAB to interfere with XM because we as consumers are paying for the service. Thank You!
